

## *Best Selection*

### Fiber Sensors

Best Selection Catalog

OMRON's Fiber Sensors continue to support  
an increasing range of applications.

This catalog brings you the latest information on our Fiber Units.

E32-series Fiber Units

Amplifier Units

E3X-DA-S/-MDA Series

E3X-NA Series

# Fiber Unit

## Standard Models

## First, Our Standard Lineup

...▶ P6

These Fibers Units can be used in a variety of applications, such as detecting the presence of workpieces and positioning.

### A Wide Variety of Shapes for Adapting to Different Installation Locations

Choose the model that suits the installation space from a wide variety of shapes and sizes.

### Space Savings and Simple Mounting

#### Flat Models

Flat models that allow simple screw mounting and straightforward wiring have been added to the lineup. Using these models eliminates the problem of fibers getting caught on surrounding objects.

### Detect Workpieces in Tight Spaces

#### Custom-produced Sleeves

Models with sleeves allow detection in tight spaces. We will perform the time-consuming task of fashioning the sleeve, with a length and bends to suit the space (except for ultrafine sleeves).

### Flexible, Pliable Fiber That Can Be Handled Like Wire

We have developed a broad range of fibers to meet a wide variety of needs. Multicore (flexible) fiber is a new type of standard fiber that can be used like wire without worrying about the bending radius. We have also produced fiber that will not break when used in moving parts and fiber that is not degraded by contact with oil.

You will certainly appreciate the ease of use that flexible fiber ensures.

### Length Can Be Specified in 1-m Units

#### Saving Energy and Work

We will produce fiber of the required length (in meter units). For large-scale installations, specifications of up to 20 m can be handled. (Specifications of 0.3 m and 0.5 m are also possible.)

## Special-beam Models

## Detection with Increased Reliability ...▶ P10

A variety of heads incorporating the latest optical technology makes it possible to solve common problems related to detection and to increase reliability.

- Resistant to dust and dirt
  - Capable of detecting small workpieces
  - Resistant to workpiece vibration
- Use these models to handle unstable detection conditions.

## Environment-resistive Models

## High Resistance to External Conditions with Fiber ...▶ P14

We have developed model variations for adapting to a variety of environmental conditions. These models enable detection in high-temperature environments and vacuums.

- High-temperature environments
  - Environments subject to the splattering of chemicals
  - Vacuums
- Use these models to handle applications in special environments.

## Application-corresponding Models

## Fiber Units for the Food-packaging, Semiconductor, and FPD Industries ...▶ P16

These models, which were developed for specific applications, offer top-quality detection performance.

- Label detection
  - Liquid-level detection
  - Alignment and mapping of glass substrates
  - Wafer mapping
- Use these models for specific applications.

## Features/Applications

### Standard Models

#### Flexible (New Standard)

R

- Perform wiring without worrying about the bending radius.
- Choose the model to suit the installation space from a variety of shapes.

Flexible fiber

Conventional fiber

Fewer problems

Light intensity affected by bends in fiber  
Fiber broken by getting caught on surrounding objects

#### ■ Feature: Multicore (Flexible) Fibers

A large number of ultrafine cores are all surrounded by cladding. As a result, the fiber is flexible and can be bent without significantly reducing the light intensity. This helps solve problems, such as fiber being broken by getting caught on other objects.

#### ■ Ratings/Characteristics

Min. sensing object	0.005-mm dia.
Min. bending radius	1 mm
Ambient temperature range	-40°C to 70°C (no icing or condensation)
Fiber material	Plastic (Free-cut)

#### Standard

- Choose the model to suit the installation space from a variety of shapes.
- New flat models allow space savings and simple installation.

Screw-shaped

Cylindrical

Flat

Equipped with sleeve

#### ■ Feature: Flat Models

Flat models, which allow simple attachment and wiring, have been added to the lineup. Choose the model to suit the installation space from 3 sensing directions and 2 sizes, standard and small.

#### ■ Ratings/Characteristics

Min. sensing object	0.005-mm dia.
Min. bending radius	10 or 25 mm*
Ambient temperature range	-40°C to 70°C (no icing or condensation)
Fiber material	Plastic (Free-cut)

\*Depends on the fiber diameter.

#### Break-resistant

B

- Bundle-fiber models can be used for moving parts.
- Capable of withstanding at least one million repeated bends (in typical applications).

#### ■ Feature: Bundle Fibers

The Fiber Units contain a large number of independent fine fibers, ensuring a high degree of flexibility.

#### ■ Ratings/Characteristics

Min. sensing object	0.005-mm dia.
Min. bending radius	4 mm (withstands repeated bending)
Ambient temperature range	-40°C to 70°C (no icing or condensation)
Fiber material	Plastic (Free-cut)

# Standard Models

## Fluorine Coating

- Fiber degradation due to oil is prevented using a fluoro-resin coating.
- Free cutting is possible with cutter provided.

Oil is blocked!

### Feature: Fluorine Coating

Fluoro-resin is used as the sheath material to prevent fiber degradation resulting from oil adhesion.

Note: The tip of the head is not chemical-resistant.

### Ratings/Characteristics

Min. sensing object	0.005-mm dia.
Min. bending radius	4 mm
Ambient temperature range	-40°C to 70°C (with no icing or condensation)
Fiber material	Plastic (Free-cut)

Fiber Customization Service (Fiber Length, Sleeve Length, and Bends)

### Fiber Length

- Applicable Models
  - Standard models
  - Flexible Break-resistant Models

- Model Number Used for Ordering
  - Standard model number + Fiber length
  - Fiber length: 0.3 m, 0.5 m, or any length from 1 to 20 m (in 1-m units)

### Sleeve Length and Bends

- Applicable Models
  - E32-TC200B/E32-TC200F
  - E32-DC200B/E32-DC200F
  - The E32-DC200B cannot be bent.

This customization/delivery service applies to standard models. It is aimed at reducing industrial waste and simplifying the installation procedure.

### Fiber Length vs. Sensing Distance

Through-beam Fiber Units  
(Fiber length of 2 m corresponds to 100%.)

Fiber Units with Reflective Sensors  
(Fiber length of 2 m corresponds to 100%.)

### Model Number Used When Changing Only the Sleeve Length

Model: E32-<sup>\*1</sup>C200<sup>\*2</sup>-S<sup>\*3</sup>

### Model Number Used When Changing the Sleeve Length and Bends

Model Numbers Incorporating the Bending Radius, R, and Dimensions L1 and L2  
Specifying L1 Only (Units: mm) Specifying L2 Only (Units: mm)

Bending radius	L1 (±1)	Model number	Bending radius	L2 (±1)	Model number
R5	10	E32- <sup>*1</sup> C200 <sup>*2</sup> -S <sup>*3</sup> A1	R5	5	E32- <sup>*1</sup> C200 <sup>*2</sup> -S <sup>*3</sup> A3

## Features/Applications

### Special-beam Models

#### Long Distance, High Power

- Powerful beam reduces influence of dust and dirt.
- Long sensing distance enables use in large-scale installations.

#### ■ Applications

Detecting parts inside (translucent) containers

Detecting workpieces in coating processes

#### ■ Ratings/Characteristics

Ambient temperature range	−40°C to 70°C (no icing or condensation)
Fiber material	Plastic (Free-cut)

#### ■ Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Through-beam	Equipped with large lens	20,000	E32-T17L
	Side-view, screw mounting	3,400	E32-T14
	M4 screw	1,330	E32-T11L
Reflective	Equipped with large lens	700	E32-D16
	M6 screw	400	E32-D11L

#### Ultracompact, Ultrafine Sleeve

- Ultracompact head can be installed in tight spaces.
- Ultrafine sleeve ensures reliable detection of small objects, such as electronic components.

#### ■ Applications

Alignment inspections

Detection of terminals

#### ■ Ratings/Characteristics

Min. sensing object	0.005-mm dia.
Ambient temperature range	−40°C to 70°C (no icing or condensation)
Material	Plastic

#### ■ Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Through-beam	1-dia. cylinder	130	E32-T223R
	0.5-dia. sleeve (0.25-dia. opening)	44	E32-T33-S5
	0.22-dia. sleeve (0.1-dia. opening)	5	E32-T334-S5
Reflective	0.8-dia. sleeve	16	E32-D33
	0.5-dia. sleeve	3	E32-D331

\*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

## Special-beam Models

### Coaxial, Small Spot

- Small spot diameter (0.1 mm min. in diameter) enables the reliable detection of small workpieces.
- Use of red light ensures easy visual recognition and simple positioning.

E32-C42+  
E39-F3A

### Applications

#### Detecting of CDs

E32-C31+  
E39-F3C

### Ratings/Characteristics

Min. sensing object	0.005-mm dia.
Ambient temperature range	–40°C to 70°C (no icing or condensation)
Fiber material	Plastic

### Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Coaxial, reflective	Coaxial, M6 screw	 300	E32-CC200
	Coaxial, 3-dia. cylinder	 150	E32-D32L
	Small spot	0.1-dia. spot at a distance of 7 mm	E32-C41+ E39-F3A-5
	Small variable spot	Spot diameter variable in the range 0.1 to 0.6 mm at distances in the range 6 to 15 mm	E32-C42+ E39-F3A
	Long distance, small spot	0.5-dia. spot at 17 mm	E32-C31+ E39-F3B
	Long distance, parallel light	Spot diameter of 4 mm max. at distances in the range 0 to 20 mm	E32-C31+ E39-F3C

\*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

## Features/Applications

### Special-beam Models

#### Fine Beam (Narrow Vision Field)

- Fine beam reduces unwanted light in surrounding area.
- Powerful beam allows use in applications requiring a long sensing distance.

#### Applications

Alignment inspection  
of orientation flats

#### Ratings/Characteristics

Min. bending radius	10 mm
Ambient temperature range	-40°C to 70°C (no icing or condensation)
Fiber material	Plastic (Free-cut)

#### Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Through-beam	Top view	1,900	E32-T22S
	Side view	1,300	E32-T24S

\*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

#### Area Sensing

- These Fiber Units ensure greater reliability with the detection of position inconsistencies in passing workpieces and the presence of workpieces with holes.
- Wide sensing bands of 11 and 30 mm (through-beam models) enable the detection of large position inconsistencies.

#### Applications

Detecting passage of  
candies

E32-T16WR

Detecting chips on film

E32-T16PR

#### Ratings/Characteristics

Ambient temperature range	-40°C to 70°C (no icing or condensation) E32-T16W□ only: -25°C to 55°C
Fiber material	Plastic (Free-cut)

#### Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Through-beam	Sensing width: 11 mm	840	E32-T16PR
	Sensing width: 11 mm Flat-view	750	E32-T16JR
	Sensing width: 30 mm	1,300	E32-T16WR
Refective	Beam width: 11 mm	150	E32-D36P1

\*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

# Special-beam Models

## Retroreflective

- The return optical path ensures that more light is interrupted by transparent workpieces than with through-beam models.
- Equipped with MSR function to eliminate light reflected directly from the workpiece.

E32-R16

## Applications

Detecting translucent medicine

E32-R21

## Ratings/Characteristics

Ambient temperature range	E32-R21: -40°C to 70°C E32-R16: -25°C to 55°C (with no icing or condensation)
Fiber material	Plastic <span style="border: 1px solid black; border-radius: 50%; padding: 2px;">Free-cut</span>

## Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Retro-reflective	MSR function, M6 screw	 250	E32-R21
	MSR function, screw mounting, long distance	 1,500	E32-R16

\*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

## Limited-reflective

- Limited-reflective models eliminate light reflected from distant objects.
- Small level differences can be reliably detected.
- The optical-axis direction can be selected according to the installation space.

E32-L24L

## Applications

Detecting connector pins

Detecting wafers (glass substrates)

E32-L25L

E32-L24L

## Ratings/Characteristics

Min. sensing object	0.005-mm dia.
Fiber material	Plastic <span style="border: 1px solid black; border-radius: 50%; padding: 2px;">Free-cut</span> 200°C models only: Glass

## Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Limited-reflective	Ultracompact, flat-view Ideal for checking stocks of glass substrates	 0 to 4	E32-L24S
	Heat-resistant up to 105°C, top-view	 5.4 to 9 (center: 7.2)	E32-L25L
	Wide sensing range, flat-view	 0 to 15	E32-A10
	Heat-resistant up to 200°C, flat-view	 4 to 10	E32-L86

\*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

# Features/Applications

## Environment-resistant Models

### Heat-resistant

- These Fiber Units can be used for various applications in temperatures up to 400°C.

E32-T84S-S

### Applications

Detecting wafers in high-temperature environments

E32-T61-S

### Ratings/Characteristics

	150°C models	200°C and higher models	
		E32-T81R E32-D81R	All other models
Min. bending radius	35 mm	10 mm	25 mm
Fiber material	Plastic (fluororesin coating)	Glass (fluororesin coating)	Glass (SUS spiral coating)

### Overview of Model Variations

Type	Ambient temperature range	Features	Shape, sensing distance (mm)* <sup>1</sup>	Model number
Through-beam	-40°C to 150°C	M4 screw	 760	E32-T51
	-40°C to 200°C	L-shaped, long distance	 1,300	E32-T84S-S
	-60°C to 350°C	M4 screw	 450	E32-T61-S
Reflective <sup>2</sup>	-60°C to 350°C	M6 screw	 90	E32-D61-S
	-40°C to 400°C	M6 screw, with sleeve	 60	E32-D73-S

\*<sup>1</sup> The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

\*<sup>2</sup> Order the Fiber Unit based on the Amplifier Unit. Use the E32-D□-S if the E3X-DA□-S, E3X-MDA□, or E3X-DAC□-S is used. Use the E32-D□ if any other Amplifier is used.

### Chemical-resistant

- Built-in lens and high-power beam reduce the influence of dirt and drops of water.
- Round design prevents drops of water sticking to the head (E32-T11F).

E32-T14F

### Applications

Detecting workpieces in cleaning processes

E32-T12F

### Ratings/Characteristics

	All other models	E32-T51F	E32-T81F-S
Ambient temperature range	-40°C to 70°C	-40°C to 150°C	-40°C to 200°C
Fiber material	Plastic (fluororesin coating)		Glass (fluororesin coating)

### Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Through-beam	Water-resistant round head	 2,000	E32-T11F
	Built-in lens, high power	 3,000	E32-T12F
	Heat-resistant up to 200°C	 700	E32-T81F-S
Reflective <sup>2</sup>	Built-in lens, high power	 95	E32-D12F

\*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

## Environment-resistant Models

### Vacuum-resistant

- These models can be used in high-vacuum environments at pressures from  $10^{-5}$  to 0.1 Pa.
- The 4-channel multi-flange, which has a maximum leakage rate of  $1 \times 10^{-10}$  Pa·m<sup>3</sup>/s, contributes to space savings.

### Applications (Configuration Example)

### Ratings/Characteristics

	120°C models	200°C models	Atmospheric-pressure side
Min. bending radius	30 mm	25 mm	
Fiber material	Glass (fluororesin coating)	Glass (SUS spiral coating)	Plastic <span style="border: 1px solid black; border-radius: 50%; padding: 2px;">Free-cut</span>

### Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Through-beam	M4 screw, top-view, heat-resistant up to 120°C, long distance	1,000	E32-T51V+ E39-F1V
	L-shaped, heat-resistant up to 120°C	130	E32-T54V 1M
	L-shaped, long distance, heat-resistant up to 200°C	480	E32-T84SV 1M

\*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

### Fiber Units on Atmospheric-pressure Side

Appearance	Type	Model number
	Common	E32-T10V 2M

### Flanges

Appearance	Type	Model number
	4-channel flange	E32-VF4
	1-channel flange	E32-VF1

### Ratings/Characteristics

Number of channels	4 channels	1 channels
Item	Model	Model
	E32-VF4	E32-VF1
Leakage rate	$1 \times 10^{-10}$ Pa·m <sup>3</sup> /s max.	
Ambient temperature range	Operating: -25°C to 55°C Storage: -25°C to 55°C	
Material	Aluminum (A5056)	Stainless steel (SUS304) Aluminum (A5056)
Flange-seal material	Fluorocarbon rubber (Viton)	
Weight (packed state)	Approx. 280 g	Approx. 240 g

## Features/Application

### Application-corresponding Models

#### Label Detection

- Built-in lens and high-power beam enable the reliable detection of labels through a mounting board.
- These Fiber Units can be washed with hydrogen peroxide, making them ideal for the food industry.

E32-G14

#### Applications

##### Detecting labels

E32-G14

#### Ratings/Characteristics

Ambient temperature range	-40°C to 70°C (no icing or condensation)
Fiber material	Plastic <span style="border: 1px solid black; border-radius: 50%; padding: 2px;">Free-cut</span>
Degree of protection	IP67

#### Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Through-beam	Slot sensor, no adjustment of optical axis required	 10	E32-G14
	Screw mounting, side-view	 3,400	E32-T14

\*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

#### Liquid-level Detection

- Area sensing is possible with minimal influence from bubbles and drops of water (E32-A01/A02/D36T).
- For safety when disconnections occur, two models have been developed, a light ON model for liquid presence and a light ON model for liquid absence (E32-A01/A02).

##### Tube-mounting model

E32-D36T

##### Liquid-contact model

E32-D82F1

#### Operating Principle

The presence/absence of liquid is detected using the refractive properties of light. More specifically, it utilizes the fact that the difference in refractive index between the air and the tip/tube is larger than the difference between the liquid and the tip/tube.

#### Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Tube-mounting	Light ON when liquid is present (ideal for checking lower limits)	Applicable tube: Transparent tube with a diameter of 3.2, 6.4, or 9.5 mm and a recommended wall thickness of 1 mm	E32-A01
	Light ON when liquid is absent (ideal for checking for overflow)	Applicable tube: Transparent tube with a diameter in the range 6 to 13 mm and a recommended wall thickness of 1 mm	E32-A02
	No restriction on tube diameter, resistant to bubbles and drops of water	Applicable tube: Transparent tube (no restriction on diameter)	E32-D36T
Liquid-contact	Heat-resistant up to 200°C, shape prevents liquid buildup	Liquid-contact model	E32-D82F1

\*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

## Application-corresponding Models

### Glass-substrate Alignment

- There is little variation of detection position within the detection range ( $\pm 0.1$  mm max.)
- The different model variations can handle a variety of sensing distances and temperature conditions.

E32-L16-N

### Engineering Data (E32-A07/A08/L16-N)

Detection-Position Characteristic (Typical Examples)

### Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Limited-reflective	0 to 15 mm, wide-range sensing	 0 to 15	E32-L16-N
	Long-distance sensing	 10 to 20	E32-A08
		 15 to 25	E32-A07E1 E32-A07E2
	Heat-resistant up to 300°C	 5 to 18	E32-L66

\*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

### Glass-substrate Mapping

- These models can reliably detect thin glass-substrate end faces ( $t = 0.5$  mm, beveled edge).
- Using a large-diameter lens makes it possible to cope with tilting of the glass substrates.

E32-A09

### Engineering Data (E32-A09)

### Overview of Model Variations

Type	Features	Shape, sensing distance (mm)*	Model number
Limited-reflective	Large-diameter lens ensures resistance to tilting	 15 to 38 (center: 25)	E32-A09
	Heat-resistant up to 150°C		E32-A09H
	Heat-resistant up to 300°C	 20 to 30 (center: 25)	E32-A09H2

\*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

## Features/Applications

### Application-corresponding Models

#### Wafer Mapping

- Wafers are reliably detected with an ultrafine beam.
- The optical axis is adjusted before delivery to allow easy installation.

#### ■ Features

Optical axis adjusted before delivery so that displacement is typically within 0.1°.

#### ■ Engineering Data

#### ■ Overview of Model Variations

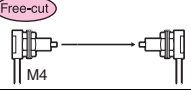

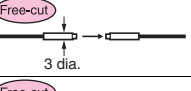

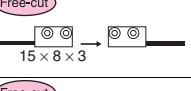

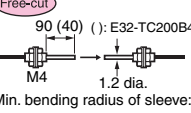

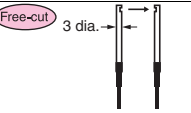

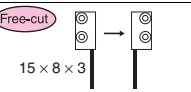

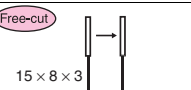

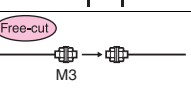

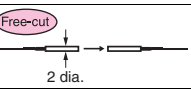

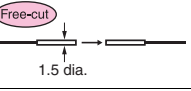

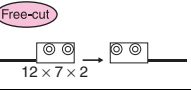

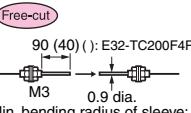

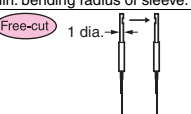

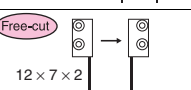

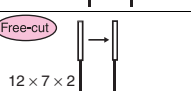

Type	Features	Shape, sensing distance (mm)*	Model number
Through-beam	Opening angle: 1.5°	 890	E32-A03
	With mounting flange		E32-A03-1
	Opening angle: 3° ultraslim	 340	E32-A04
	With mounting flange		E32-A04-1

\*The sensing distances apply for use in combination with the E3X-DA-S Amplifier Unit (general-purpose, standard mode).

\*1. The values for the minimum sensing object are representative values that indicate values obtained in standard mode with the sensing distance and sensitivity set to optimum values.

\*2.  Indicates models that allow free cutting.

\*3. This is the value for which detection is possible within the sensing area, with the sensing distance set to 300 mm. (The sensing object is stationary.)

\*4. This is the value for which detection is possible within the sensing area, with the sensing distance set to give a digital value of 1,000. (The sensing object is stationary.)

\*5. For continuous operation, use the products within a temperature range of -40°C to 130°C.

\*6. The maximum temperature that can be withstood varies with the location. Refer to dimensions diagrams for details.

\*7. The optical fiber is 2 m long on each side, so the sensing distance is 4,000 mm.

- \*1. The sensing distances are for white paper.
- \*2. The values for the minimum sensing object are representative values that indicate values obtained in standard mode with the sensing distance and sensitivity set to optimum values.
- \*3. Free-cut Indicates models that allow free cutting.
- \*4. For continuous operation, use the products within a temperature range of -40°C to 90°C.
- \*5. The maximum temperature that can be withstood varies with the location. Refer to dimensions diagrams for details.
- \*6. Order the Fiber Unit based on the Amplifier Unit. Use the E32-D□-S if the E3X-DA□-S, E3X-MDA□, or E3X-DAC□-S is used. Use the E32-D□ if any other Amplifier is used.

## Application-corresponding Fiber Units

■ High-resolution mode 
 ■ Standard mode 
 ■ High-speed mode 
 ■ Super-high-speed mode 
 \*When used in combination with the E3X-DA-S Amplifier Unit (general-purpose).

Type	Appearance (mm) *2	Dimensions page	Sensing distance (mm)				Standard object (min. sensing object) (mm)*1	Min. bending radius (mm)	Features	Model number
Label-detection		57	10	10	10 (10)		4 dia. (0.1 dia.)	R25	Slot sensor (no adjustment of optical axis required)	E32-G14
		43				4,500 3,400 2,250 (900)			Screw mounting, side-view	E32-T14
Liquid-level detection		57	Applicable tube: Transparent tube with a diameter in the range 8 to 10 mm and a recommended wall thickness of 1 mm					R10	Compact	E32-L25T
		57	Applicable tube: Transparent tube (no restriction on diameter)					R4	No restriction on tube diameter, resistant to bubbles and drops of water	E32-D36T
		58	Applicable tube: Transparent tube with a diameter of 3.2, 6.4, or 9.5 mm and a recommended wall thickness of 1 mm						Light ON when fluid is present, resistant to bubbles and drops of water	E32-A01
		58	Applicable tube: Transparent tube with a diameter in the range 6 to 13 mm and a recommended wall thickness of 1 mm						Light ON when fluid is not present, resistant to bubbles and drops of water	E32-A02
		58	Liquid-contact models					R40	Heat resistant up to 200°C, fluororesin cover	E32-D82F1 E32-D82F2
Glass-substrate-alignment		54	0 to 15	0 to 15	0 to 15 (0 to 12)		Soda glass with reflection factor of 7%	R25	Variation of detection position within the detection range: 0.1 mm	E32-L16-N
		58	10 to 20	10 to 20	10 to 20 (-)					E32-A08
		58	15 to 25	15 to 25	10 to 20 (-)					E32-A07E1 *5 E32-A07E2 *5
		58	5 to 18	5 to 18	5 to 16 (-)			R25	Heat resistant up to 300°C *3, *4	E32-L66
		54	10 to 20	10 to 20	10 to 20				Heat resistant up to 300°C	E32-A08H2

\*1. The values for the minimum sensing object are representative values that indicate values obtained in standard mode with the sensing distance and sensitivity set to optimum values.

\*2. Free-cut Indicates models that allow free cutting.

\*3. The maximum temperature that can be withstood varies with the location. Refer to dimensions diagrams for details.

\*4. These values are based on the assumption that there are no repeated sudden changes in temperature.

\*5. The characteristics for sensing object incline are different between the Attachments with model numbers ending in "E1" and "E2." Refer to page 52 for installation precautions.

## Mounting hole dimensions (recommended)

### <Screw-mounting Model>

(Unit:mm)

Outer diameter of fiber unit	M3	M4	M6	M14
F dimensions	$3^{+0.5}_0$ dia.	$4^{+0.5}_0$ dia.	$6^{+0.5}_0$ dia.	$14^{+1}_0$ dia.

Example: Head size of E32-TC200 is M4. Open the mounting holes with 4 to 4.5 dia.

### <Cylindrical Model>

(Unit:mm)

Outer diameter of fiber unit	1 dia.	1.5 dia.	2 dia.	3 dia.
F dimensions	$1.2^{+0.2}_0$ dia.	$1.7^{+0.2}_0$ dia.	$2.2^{+0.2}_0$ dia.	$3.2^{+0.2}_0$ dia.
Outer diameter of fiber unit	3.5 dia.	4 dia.	5 dia.	6 dia.
F dimensions	$4^{+0.5}_0$ dia.	$4.5^{+0.5}_0$ dia.	$5.5^{+0.5}_0$ dia.	$6.5^{+0.5}_0$ dia.

Example: Head size of E32-T22 is 2 dia.. Open the mounting holes with 2.2 to 2.4 dia.

## Minimum bending radius

Using the E32-D81R

- Note 1. The maximum allowable temperatures for sections A and B are 200°C and 110°C, respectively. The section inserted into the Amplifier Unit (indicated by \*), however, must stay within the Amplifier Unit's operating temperature range.
2. Order the Fiber Unit based on the Amplifier Unit. Use the E32-D81R-S if the E3X-DA□-S, E3X-MDA□, or E3X-DAC□-S is used. Use the E32-D81R if any other Amplifier is used.

Using the E32-D61

- Note 1. The maximum allowable temperatures for sections A and B are 350°C and 110°C, respectively. The section inserted into the Amplifier Unit (indicated by \*), however, must stay within the Amplifier Unit's operating temperature range.
2. Order the Fiber Unit based on the Amplifier Unit. Use the E32-D61-S if the E3X-DA□-S, E3X-MDA□, or E3X-DAC□-S is used. Use the E32-D61 if any other Amplifier is used.

Using the E32-D73

- Note 1. The maximum allowable temperatures for sections A, B, and C are 400°C, 300°C, and 110°C, respectively. The section inserted into the Amplifier Unit (indicated by \*), however, must stay within the Amplifier Unit's operating temperature range.
2. Order the Fiber Unit based on the Amplifier Unit. Use the E32-D□-S if the E3X-DA□-S, E3X-MDA□, or E3X-DAC□-S is used. Use the E32-D□ if any other Amplifier is used.

## Lens Units

### Lens Units E39-F1

Material:  
Brass for the body and optical glass for the lens itself.

Note: Two per set.

### Side-view Units E39-F2

Material:  
Brass for the body and optical glass for the lens itself.

Note: Two per set.

### Reflection Unit with Lens E39-F3

Material:  
Brass for the body and aluminum for the base.

\* Secure the fiber head with the slotted-head set screws. Do not insert a lens (E39-F1).

### Lens Unit for Reflective Fiber Units E39-F3A

Material:  
Aluminum for body and optical glass for lens.

Note: This is the Lens Unit for the E32-D32 and E32-C42.

### Lens Unit for Reflective Fiber Units E39-F3A-5

Material:  
Aluminum for body and optical glass for lens

Note: This is the Lens Unit for the E32-C31 and E32-C41.

### Lens Unit for Reflective Fiber Units E39-F3B

Material:  
Aluminum for body and optical glass for lens.

Note: This is the Lens Unit for the E32-C31 and E32-C41.

### Lens Unit for Reflective Fiber Units E39-F3C

Material:  
Aluminum for body and optical glass for lens.

Note: This is the Lens Unit for the E32-C31 and E32-C41.

## Protective Spiral Tubes

### E39-F32A/F32A5 E39-F32B/F32B5

Note 1. The length L is 1,000 for the E39-F32A/-F32B and 500 for the E39-F32A5/-F32B5.  
2. The E39-F32B(5) consists of two E39-F32A(5)s.

### E39-F32C/F32C5

Note: The length L is 1,000 for the E39-F32C and 500 for the E39-F32C5.

### E39-F32D/F32D5

Note: The length L is 1,000 for the E39-F32D and 500 for the E39-F32D5.

# Accessories

## Other Accessories

### Fiber Cutter E39-F4

### Thin-fiber Attachments E39-F9

Material: ABS

Note: Two per set.  
\*Provided with thin-fiber models.

### Fiber Connector E39-F10

### Fiber Connector E39-F13 E39-F14 E39-F15

Note: Dimension A varies with the model number as shown in the following table.

Model	Dimension A
E39-F13	2.4
E39-F14	1.2
E39-F15	2.4/1.2

### Sleeve Bender E39-F11

### Mounting Bracket E39-L83

## Safety Precautions

Refer to **Warranty and Limitations of Liability**.

### WARNING

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

### Precautions for Correct Use

Do not use the product in atmospheres or environments that exceed product ratings.

#### Fiber Units

##### ● Mounting

##### Tightening Force

The tightening force used to mount the Fiber Unit must not be more than the value given in Ratings/Characteristics.

##### Screw-mounting Model

##### Cylindrical Model

##### Chemical-resistive Models

The following method is recommended to prevent the fluororesin case from cracking when the Sensor is being secured. Be especially careful not to crack the case when using screws to secure the Sensor.

#### Fiber Cutting Procedure

Cut a thin fiber as follows:

(1)	The fiber is shipped loosely tightened as shown in the figure at the right.	
(2)	Adjust the fiber to the desired length and then tighten it securely.	
(3)	Insert the fiber to be cut into the E39-F4.	
(4)	Finished state (proper cutting state)	

#### Connection

- Do not excessively pull or press the Fiber Unit. Use a pulling force no higher than what is given in *Ratings/Characteristics*.
- Do not bend the Fiber Unit beyond the permissible bending radius given under *Ordering Information*.
- Do not bend the edge of the Fiber Units (excluding the E32-T□R and E32-D□R).

##### Correct

##### Incorrect

- Do not apply excess force on the Fiber Units.

##### Correct

##### Incorrect

The Fiber Head could be broken by excessive vibration. To prevent this, the following is effective:

### E39-F11 Sleeve Bender

- The bending radius of the stainless steel tube should be as large as possible. The smaller the bending radius becomes, the shorter the sensing distance will be.
- Insert the tip of the stainless steel tube to the Sleeve Bender and bend the stainless steel tube slowly along the curve of the Sleeve Bender.

### Heat-resistant Fiber Units

(E32-D51 and E32-T51)

- The fibers of these Units cannot be extended using the E39-F10 Fiber Connector.
- The maximum allowable temperature for continuous operation with these Units is 130°C. It is 150°C for short-term use.

### E32-T14 and E32-G14

These Units may enter the light-ON state if there are reflecting objects at the ends of the lenses. In this case, attach the black stickers provided to the ends of the lenses.

### Wafer Sensors (E32-L25(A))

- To ensure correct performance, insert the fiber with a white line into the emitter-side port of the Amplifier Unit.

### E32-T16 and E32-T16P

#### Example

E32-T16's sensing head

To use the slit provided, peel off the backing sheet, align it with the edges of the sensing surface, and attach it to the sensing head. Use the slit in applications where saturation occurs (i.e., changes in light intensity cannot be obtained) due to short sensing distances.

### E32-M21

Separate the 4 fibers by distances sufficient to prevent interference.

### Vacuum-resistant Fiber Units (E32-V)

Although Flanges, Fiber Units on the vacuum side, and Lens Units have been cleaned, as an extra precaution, clean these products with alcohol before use in high-vacuum environments to ensure that they are properly degreased.

### Liquid-level Detection Sensors (E32-D82F)

- Secure the Fiber Unit using the unbendable section. Otherwise, the liquid-level detection position may be displaced.
- For applications in hazardous environments, install the Fiber Unit in the hazardous environment but install the Amplifier Unit in a safe environment.

### Liquid-level Detection Sensors: Tube-mounting Models

- Ensure that the tube is not deformed when using a band to secure the Fiber Unit.
- Drops of water, bubbles, or haze inside the tube may cause malfunctions.

### E32-A07E1(E2)

There is a difference in sensing object angle between E32-A07E1 and E32-A07E2. Select a model in accordance with the bending direction of a sensing object. Use the fiber with a model display tube as light emitting side.

### ● Adjustment

#### E32-G14

When a Digital Fiber Amplifier is used, the sensing distance is short, making the incident light intensity large. This makes it impossible to teach without a workpiece.

### Liquid-level (E32-D82F) Detection Position

The liquid-level detection position is at a distance of  $5.2 \pm 2$  mm from the end of the fluororesin section. (Refer to the diagram on the right.)

The liquid-level detection position varies with the surface tension of the liquid and the degree of wetness at the Fiber Unit's detection position.

### ● Other Considerations

#### Liquid Level (E32-D82F)

- Operation may become unstable in the following cases:
  - ① Bubbles stick to the cone of the sensing head.
  - ② Solute is deposited on the cone of the sensing head.
  - ③ The liquid has a high viscosity.
- There are some liquids, such as milky white liquids, for which detection is not possible.
- Do not let the end of the fluororesin section bump into another object. Damage to, or deformation of, the sensing head may result in unstable operation.

### Heat-resistant Fiber Units (E32-D81R(-S), E32-D61(-S), and E32-D73(-S))

The pitch of the emission-side and reception-side fiber-insertion ports varies with the Amplifier Unit. Be sure to use an appropriate Fiber Unit.

Amplifier Unit	Fiber Unit
E3X-DA□-S E3X-MDA□	E32-D□-S
E3X-DA□-N E3X-NA□	E32-D□

### Chemical-resistant Fiber and Liquid Level (E32-D82F)

Fluororesin has high chemical resistance. However, applications in the atmosphere of vaporized chemicals (gases) or steam may cause malfunction or damage inside sensors. Run a full check before using in such environments.

## ■ Accessories

### Use of E39-R3 Reflector

1. Use detergent, etc., to remove any dust or oil from the surfaces where tape is applied. Adhesive tape will not be attached properly if oil or dust remains on the surface.
2. The E39-R3 cannot be used in places where it is exposed to oil or chemicals.

### E39-F32□ Protective Spiral Tubes

1. Insert a fiber to the Protective Spiral Tube from the head connector side (screwed) of the tube.

2. Push the fiber into the Protective Spiral Tube. The tube should be straight so that the fiber is not twisted when inserted. Then turn the end cap of the spiral tube.

3. Secure the Protective Spiral Tube on a suitable place with the attached nut.

4. Use the attached saddle to secure the end cap of the Protective Spiral Tube. To secure the Protective Spiral Tube at a position other than the end cap, apply tape to the tube so that the portion becomes thicker in diameter.

### E39-F10 Fiber Connector

Mount the Fiber Connector as shown in the following illustrations.

1. Insert the Fiber Unit into the retention clip.
2. Insert the retention clip into the splice.

- The Fiber Units should be as close as possible when they are connected. Sensing distance will be reduced by approximately 25% when fibers are connected.
- Only 2.2-mm dia. fibers can be connected.

## **READ AND UNDERSTAND THIS DOCUMENT**

Please read and understand this document before using the products. Please consult your OMRON representative if you have any questions or comments.

## **WARRANTY**

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

## **LIMITATIONS OF LIABILITY**

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

## **SUITABILITY FOR USE**

THE PRODUCTS CONTAINED IN THIS DOCUMENT ARE NOT SAFETY RATED. THEY ARE NOT DESIGNED OR RATED FOR ENSURING SAFETY OF PERSONS, AND SHOULD NOT BE RELIED UPON AS A SAFETY COMPONENT OR PROTECTIVE DEVICE FOR SUCH PURPOSES. Please refer to separate catalogs for OMRON's safety rated products.

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the product.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this document.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

## **PERFORMANCE DATA**

Performance data given in this document is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

## **CHANGE IN SPECIFICATIONS**

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the product may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products.

## **DIMENSIONS AND WEIGHTS**

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

## **ERRORS AND OMISSIONS**

The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.

## **PROGRAMMABLE PRODUCTS**

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

## **COPYRIGHT AND COPY PERMISSION**

This document shall not be copied for sales or promotions without permission.

This document is protected by copyright and is intended solely for use in conjunction with the product. Please notify us before copying or reproducing this document in any manner, for any other purpose. If copying or transmitting this document to another, please copy or transmit it in its entirety.

**ООО «НИОКРсистемс»** - это оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов. Реализуемая нашей компанией продукция насчитывает более полумиллиона наименований.

Благодаря этому наша компания предлагает к поставке практически не ограниченный ассортимент компонентов как оптовыми, мелкооптовыми партиями, так и в розницу.

Благодаря развитой сети поставщиков, помогаем в поиске и приобретении экзотичных или снятых с производства компонентов.

### **Наша компания это:**

- Гарантия качества поставляемой продукции
- Широкий ассортимент
- Минимальные сроки поставок
- Техническая поддержка
- Подбор комплектации
- Индивидуальный подход
- Гибкое ценообразование
- Работаем по 275 ФЗ
