UL Recognized Filtered Terminal Blocks

Application

Recognized by UL, the TUSONIX Filtered Terminal Block is specifically designed to save time and money for EMI filtering applications.

By combining a filtering component with an industry standard terminal block, TUSONIX has created an effective barrier to EMI noise. TUSONIX' Filtered Terminal Blocks allow the engineer to eliminate EMI using an existing mechanical design concept.

TUSONIX' commitment to excellence and service allows for customization of the filtered terminal blocks to meet your specific EMC qualifications.

Backed by decades of ceramic component production experience, TUSONIX Filtered Terminal Blocks will meet or exceed your demanding application requirements.

Benefits

- Saves Labor and Space
- Consistent Panel Layout
- Solves EMI Problems
- Meets Specific Requirements

Features

- Filter Integral to Block
- Industry Standard Block
- Wide Range of Performance
- Customization

- Industrial Process Control Equipment
- Power Supplies
- Office and Lab Equipment

Filtered Terminal Block Specifications

1.0 Scope

This specification describes the basic performance requirements of TUSONIX Filtered Terminal Blocks.

2.0 Capacitance

Measurement Conditions: Capacitance measured at $25^{\circ}\pm 2^{\circ}\text{C}$, 50% max R.H. and Frequency of 1 KHz @ $1\pm 0.2\text{VRMS}$.

3.0 Insertion Loss

3.1 Measurement Conditions: Insertion Loss values listed are measured in a 50W system at $25^{\circ}\text{C}\pm 2^{\circ}\text{C}$ under no-load conditions.

3.2 Insertion Loss: The Insertion Loss values listed are typical values for both 500 and 600 styles under indicated conditions.

3.3 Listed Insertion Loss data is a measurement of filter performance in a matched 50W system. It is highly recommended that filter performance be verified under actual circuit operation conditions.

4.0 Operating Conditions

Filters are designed to operate continuously at the voltage and current that is stated for each TUSONIX part number. If the operating ambient temperature is significantly higher than 25°C , the terminal blocks should be installed in equipment and tested under actual conditions to ensure that maximum temperatures are not exceeded.

5.0 Dielectric Withstanding Voltage

Filters shall withstand the specified voltage applied between the screw terminal and ground plane for one minute. Surge current shall be limited to a maximum of 50mA.

6.0 Insulation Resistance

Measured at $25^{\circ}\text{C}\pm 2^{\circ}\text{C}$ with 100VDC and charging current limited to 50mA max. The IR, after two minutes maximum application of the test voltage, shall be a minimum of 10 G Ω .

Mechanical Specifications

- Center Spacing: .437 [11.10]
- Wire Size: up to 12AWG, Ø.081[2.06]
- Molded Material: High Temp Thermoplastic (PBT), UL rated 94 V-0
- Block Mounting: Recommended mounting screw (#8 Pan Head) Torque 5in.lbs. [0.56 Nm] Max.
- Terminal: Brass, Tin-plated

UL Recognition

- EMI Filters recognized to UL Standard 1283
- Terminal Block recognized to UL Standard 1059
- Reference UL File Number E201344

Electrical Specifications

- Operating Temperature: -40°C to 105°C
- Working Voltages: ≤ 250 VAC *
- Capacitance: ≥ 2000pF
- Dielectric Withstanding Voltage: 1500VAC *
- Insulation Resistance: ≥ 10 GΩ
- Current Rating: 20A
- DC Resistance: ≤ 10 mΩ
- Typical Insertion Loss[dB], in 50 Ω Circuit

10 MHz	100 MHz	1 GHz	10 GHz
5dB	50dB	60dB	65dB

(For additional insertion loss values, please contact the factory directly.)

* AC Frequency 50/60Hz

UL Recognized 30 AMP "C" Filtered Terminal

Please Note - Two screw sizes are available: The #6-32 (601) screw with combination head screw & clamp washer and the #8-32 (602) screw without clamp washer.

Product Installation Recommendations

Product Installation Recommendations

The components in this catalog are manufactured with ceramic dielectrics. To minimize possible damage to the components during installation, the recommendations below should be followed. For information concerning other installation requirements and/or component modifications, consult TUSONIX Customer Engineering at (520) 744-0400.

General Recommendations

Handling: Excessive force or direct impact to the component may result in breakage. Lead bending or cutting, if necessary, should be done with a support for the lead to prevent mechanical stress to the component. Components with required lead modifications are available from TUSONIX.

Lead Soldering: Use a temperature controlled soldering iron with SN60 or SN63 RMA Flux core wire. Maximum soldering temperature to be 500°F(260°C) with a dwell time of 3 seconds maximum. The use of a heat sink between the component body and the solder joint is highly recommended.

Flux Removal: Optimum flux removal can be achieved by vapor degreasing the components immediately after the soldering operation. Total immersion of the components is not recommended.

Tusonix, a World Leader in the manufacturing of EMC Products, features an Extensive Line of EMI/RFI Filters and Capacitors and Coaxial Resonators.

Exceeding Customer Needs throughout the World

Thank you for visiting TUSONIX, Inc., Online. Located in sunny Tucson, Arizona, TUSONIX offers a broad line of EMI/RFI Filters, Surface Mount EMI Filters, Variable Trimmer Capacitors, Filtered Terminal Blocks, Custom EMI Filter Plate Assemblies and Ceramic Disc Capacitors. This Web Site is designed to assist Engineers and Purchasing Agents in the selection of TUSONIX products. Catalogs are available within this site as Adobe Acrobat ® pdf downloads. Also, this site offers an online Information Request section, which allows site visitors to make specific requests for catalogs and samples or convey engineering inquiries.

The TUSONIX Web site provides visitors with a wide range of product and ordering information.

At www.tusonix.com, customers can download catalogs & part data sheets, check stock and use the cross reference feature, as well as view or link to Sales Offices, International Agents and Distributors.

An on-line request form allows customers to immediately specify product requirements and request additional product information on the spot.

ООО «НИОКРсистемс» - это оперативные поставки широкого спектра электронных компонентов отечественного и импортного производства напрямую от производителей и с крупнейших мировых складов. Реализуемая нашей компанией продукция насчитывает более полумиллиона наименований.

Благодаря этому наша компания предлагает к поставке практически не ограниченный ассортимент компонентов как оптовыми, мелкооптовыми партиями, так и в розницу.

Благодаря развитой сети поставщиков, помогаем в поиске и приобретении экзотичных или снятых с производства компонентов.

Наша компания это:

- Гарантия качества поставляемой продукции
- Широкий ассортимент
- Минимальные сроки поставок
- Техническая поддержка
- Подбор комплектации
- Индивидуальный подход
- Гибкое ценообразование
- Работаем по 275 ФЗ
