

720 TFX Series Sealed and Rugged Keypads

These tough, water resistant keypads feature moving, tactile keys with a responsive 'over-centre' action and are designed for use in harsh industrial environments. High contrast white keytops are permanently laser engraved with black characters.

The keypad can be installed on the surface or under the panel.
(Underpanel Installation Instructions are in the Underpanel Fitting Kit)
Fit the supplied silicone seal into the seal groove on the keypad
Use the groove on top for underpanel, and on back for surface fix.
The wide part of the seal goes into the groove – see picture below of the seal fitted to the back of the keypad.
